What will I know by the end of this unit?

- I can name things that are living, dead and never been alive.
- I know that a habitat is a place where living things can find all the things they need to survive.
- I know that living things need food, water, air, space to grow and some shelter.
- I know that microhabitats are very small habitats where mini beasts live.
- I know that animals and plants depend on each other to survive and all living things have a part to play in food chains.
